EXPERIENCE

Reality Defender, New York, NY 11/2023-01/2025
Applied Scientist II - Audio

Developed and analyzed models for audio deepfake detection; focus on audio perception and understanding [10,11]

Institute for Creative Technologies, Los Angeles, CA 12/2020-10/2023
Postdoctoral Researcher

Develop, evaluate, and analyze multimodal (text & speech) machine learning models for understanding dialog patterns in motivational interviews (MI) therapy sessions; focus on predicting MI intent codes, estimating empathy perception and correlation to behavioral outcomes, identifying salient features in MI to aid clinicians in diagnosis and therapist training [7,8,9]

University of Washington, Seattle, WA 06/2014-12/2020
Graduate Research Assistant in Speech and Natural Language Processing

- Developed models for integrating prosodic and acoustic features in spoken language tasks (parsing; dialog act recognition), analyzed the effects of speech styles and conditions (conversational vs. read, manual vs. ASR transcripts) [3,4,5,6]
- Analyzed disfluency patterns in children's speech, contributed to extending annotation system for children's speech transcript; studied acoustic models for prosodic patterns in language acquisition and learning [2]
- Developed style & topic models for characterizing language of reddit discussions; assessed the correlation between style vs. topic similarity with community endorsement, revealing higher correlation of style [1]

Liulishuo/LingoChamp (now LAIX), San Mateo, CA 06/2018-09/2018
Research Intern

Developed and evaluated seq2seq vs. transformer models to incorporate prosodic-acoustic information in parsing for second language learning; analyzed the differences of native vs. non-native speech effects on parsing [5]

Amazon Alexa Shopping, Seattle, WA 06/2017-08/2017
Applied Scientist Intern

Developed and evaluated ranking algorithms for selecting Amazon Choice items in recommendation; analyzed the utility of language features

Toyota Technological Institute, Chicago, IL 06/2016-09/2016
Visiting Graduate Intern

Developed and evaluated seq2seq architectures for constituency parsing of conversational speech, using transcripts and acoustic features [3]

Bucknell University, Lewisburg, PA 08/2012-05/2014
Graduate Research Assistant

Developed and evaluated filter- and inventory-based systems for voice conversion and speech enhancement
